

PS (POLY STYRENE) PETRI DISHES

These PS Petri Dishes are suitable for the microbiological application.

1. Vented Petri dishes have elevated lid which allows for good gas exchange and encourages evaporation
2. This design is useful when the poured dishes are to be used as soon as possible
3. Gamma sterilization is as per ISO1117 norms
4. The design of the dish maintains sterility because the particles would have to go up and over the dish wall to get inside which is very rare in normal airflow.

Catalog No.	Description	Size	Case Type
CS-PS-65	PS Petri dish, size 60x15, sterile	60x15 mm	Case of 500
CS-PS-95	PS Petri dish, size 90x15mm , sterile	90x15 mm	Case of 500
